Drouth Danger

Agent Warns Of Stock Poisoning

Special Report
By County Agent J. D. Moore
Recent livestock losses due to prussic acid poisoning should alert stockmen to the potential danger. Under certain conditions some

plants cause the death of stock from poisoning. Sudan, sorghum or Johnson grass are the most common plants causing these losses. The poisonous property usually develops in dangerous amounts only when the growth of the plants is checked or stopped by drouth, frost, trampling, mowing, or wilting.

When sorghums or other forage is thoroughly cured as hay or dry fodder, the poisonous property is usually greatly reduced, according to Morrison's Feed and Feeding. Silage that has been stored for several months is generally safe. Sudan grass is much less apt to cause poisoning than sorghums.

Stock affected by the poison often die in a few minutes after eating only a small amount of the dangerous forage, perhaps only a few mouthfuls. There is usually no time for treatment. In pasturing sorghums the only safe way is to turn an animal of less value into the field first. If no poisonous effects are observed, the rest of the stock may be allowed to graze the field.

Glucose in the rumen checks the rate of formation of the prussic acid, and it has been found that it is wise to give cattle or sheep a starchy feed, such as corn or the grain sorghums, before allowing them to graze plants that may be dangerous. The starch forms glucose in the digestive tract and thus aids in preventing trouble.

Safeway Cleared Of \$65,000 Damages In Milam Court

A 12-man Milam petit jury Tuesday found that a Safeway Stores, Inc., defendant in a \$65,000 damage suit, was not responsible for an injury suffered by plaintiff D. S. Wimberly, of Cameron. Judge W. C. Wallace presided in the Milam District Court civil action.

The jury found that Wimberly's injury, suffered when he fell on an incline ramp outside of the Cameron Safeway Store, was not the responsibility of the store owners or managers and awarded no damages.

"It was the result of an unavoidable accident," the jury found, after hearing a day of testimony from Wimberly, 66, of Cameron, county sanitarian and store manager S. D. Ripley among others. Empaneling of the jury started Monday morning. They returned the no-damage verdict after about three hours of deliberation Tuesday afternoon.

Wimberly fell and broke a kneecap outside the store Jan. 22, 1962. He sought \$3,000 in medical damages and \$62,000 for physical injuries, mental pain and suffering, expenses and incapacity, alleging that Safeway was negligent in leaving ice on the ramp and saying there should have been a handrail on the ramp.

Jurors were Ray Westbrook, Joe Humplik, Clarence Hanel, J. E. Harwell, Frank Brandon, B. F. Wise, M. H. Nance, James E. Luckey (foreman), Niley J. Smith, Don H. Riddam, M. K. Cass and John M. Clark.

On Milam's Farms and Ranches

News About Milam Farmers, Their Interests, And Activities

Price - Cost Squeeze May Affect Farmer After Big 1963 Crop

COLLEGE STATION - The price-cost squeeze on farmers may tighten some during 1963 due to larger supplies and lower average prices of farm products along with higher production costs, says John McHaney, economist with the Texas Agricultural Extension Service.

The larger output expected in 1963 will raise the gross farm income but this increase will be offset by higher prices paid by farmers, he elaborates. Economic activity of the nation as a whole increased during the early part of 1963 and will probably continue to advance the rest of the year though at a slower rate.

Exports of farm products in the calendar year of 1963 will probably total about the same as the record shipments in 1961 and 1962, says McHaney. Food fats and oils and dairy product exports will prob-

ably increase while wheat and cotton levels will remain near the 1962 figure. Poultry and feed grain exports are expected to be lower than in 1962, the economist adds.

Looking at prospects for the rest of the year, fed cattle prices are expected to improve somewhat due to a seasonal decline in fed beef production. Hog prices may be somewhat lower during the fall and early winter of 1963 than for the same period last year. This will be true if the March-May farrowings were the expected four percent higher than a year earlier.

Farm milk sales for 1963 are expected to be only one percent higher than last year and the national average support price, effective April 1, 1963, will be three cents more per hundred, says McHaney.

There will be little change in the number of layers on farms during the remainder of the year, but because of a higher rate of lay, egg numbers will be up.

The 1963 turkey crop is likely to be the same as last year's though it will have stiffer competition from broilers and red meat in the next six months than during the same span in 1962.

Cotton Research, New Trade Deal Spark Interest

COLLEGE STATION - Four late June developments, announced by the U. S. Department of Agriculture, should be of interest to producers and consumers of cotton.

Three of the developments have to do with research aimed at finding new uses for cotton and evaluating an already announced process for making all-cotton stretch yarns.

The fourth development was the announcement of Secretary Freeman of an agreement with India which provides for a record-breaking barter of cotton and possibly other agricultural products in exchange for strategic materials. Up to 300,000 bales of cotton will be exported to India, the largest bilateral barter transaction ever negotiated between the U. S. and another country.

The research announced will be conducted under contracts with the USDA. Scientists at North Carolina State College of Agriculture and Engineering will evaluate all-cotton knit wear. Others at the Stanford Research Institute on California will conduct research aimed at improving cotton fiber strength while a third group at Clemson Agricultural College in South Carolina will seek methods for producing improved cotton knit goods.

The research to be conducted at Clemson is seeking a method for producing improved cotton knit goods.

The research to be conducted at Clemson is seeking a method for producing cotton knit goods with increased bulk, warmth and dimensional stability. Such a process, the USDA said, would make cotton knit goods more suitable for use in winter apparel and thus open wider markets for cotton.

Conservation Good Despite Drouth In Milam Area

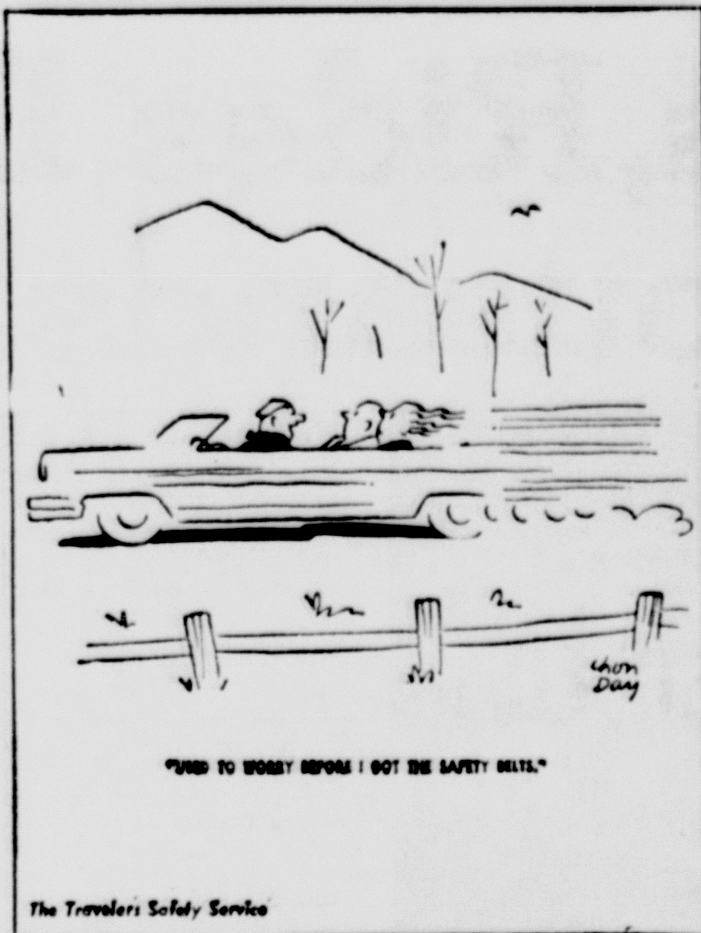

Soil Conservation Service records in Milam County show that progress in the application of the permanent, earth moving type conservation practices has been at a normal rate in spite of the drouth conditions this year. This includes such practices as farm ponds, vegetated waterways, diversions, terraces, drainage ditches, land leveling, etc.

Most land operators who apply this type practice to their land qualify for cost-share assistance through the local ACP committees. They are also provided technical assistance by Soil Conservation Service technicians who are assigned to the different Soil Conservation Districts in the county. To this date approximately 86 applications for cost-share assistance have been serviced by Soil Conservation Service technicians in the county. This includes 51 for farm ponds, 14 for waterways, 15 for terraces and 6 for diversions.

Most of the work in the last part of the year will be on cropland. Usually terrace, division, and waterway applications are the practices that dominate the conservation workload after field crops are harvested.

COTTON HARVEST

It may be early for cotton farmers to begin thinking about harvesting but early made plans are best, says B. G. Reeves, extension cotton ginning and mechanization specialist, for preventing accidents involving mechanical cotton pickers.

GOVERNOR SAVES GAS

Henry O'Neal, agricultural engineer for the Texas Agricultural Extension Service, reports that a Kansas study involving 50 farm tractors points up the importance of proper maintenance for the governor on farm tractors.

TIP FOR BASS-BUGGERS

You don't have to stop fishing at sunset. You can get in 50 or 60 more casts with that fly rod if you will dab a little phosphorescent paint on the front of your bug or fly. The paint makes it easy to follow the path of your bait in the failing light.

County Agents Notes...

Credit Featured In New Program

By J. D. Moore
Milam County Agent

Investment credit is a feature of the new and far reaching tax provisions enacted by Congress last October. Investment credit is simply a reduction of tax liability by 7 per cent of the amount of a taxpayer's investment which qualifies. Regulations which qualify property is mentioned here insofar as these tentative regulations apply to assets often used by farm and ranch operators:

a. Fences qualify for credit since these are specified in the law. It is believed that this includes corals and livestock handling facilities.

b. Grain storage bins and silos qualify for credit, the regulations stating that these are not considered as buildings.

c. Buildings and "structural components thereof" do not qualify for the investment credit. However, the regulations do not yet clarify the situation on every type of asset that might be attached or set into buildings, to be eligible for credit.

Livestock do not qualify for credit since they were eliminated by specific reference in the law.

It is not clear whether equipment such as a grain drier or air circulating system would be eligible for the credit when attached to single-purpose grain bins, but might not be eligible when it is used as a part of a building (barn

or quonset type) that might have multiple uses. In the very early interpretations it was indicated that central heating or air-conditioning systems do not qualify for credit, these being considered "Components of the building." The function of the drying equipment is more directly related to production which is a factor in qualifying property for credit.

A few examples of other assets that are usually considered qualified investments are:

a. Gasoline pumps to service farm vehicles and power equipment.

b. Hoists, welders, metal-working tools and similar items of shop equipment.

c. Saddles, bridles and related items used with animals connected with the business.

Since investment credit is a new concept in our tax structure it is important that study be given to it with the objective of helping eligible taxpayers to become aware of the significant tax saving involved.

Remember, it applies to any in-

vestment for qualified business property acquired in 1962 or subsequent years. Also, it is mandatory that the taxpayers claim the credit in the year that "asset was first used." If a sizable amount of investment credit was overlooked when the 1962 tax returns were made, an amended return should be filed, and the proper credit claimed. It will be lost otherwise.

SHIPPING YOUR OARS

Often you must ship your oars in a hurry when landing a big fish. This makes an awful racket, splashes water everywhere, and frequently barks your shins.

You won't have to ship oars if you prepare a little beforehand. Before going out next time, cover about 10 inches of heavy steel wire with rubber hose. Bend it to an "S" shape. Make a couple and hang on to each oarlock, or over the side of the gunwale.

They will support the weight of the oar blade without getting in the way of landing the fish, making shipping unnecessary.

Optometrist Notes Safest Means To Observe Eclipse

A solar eclipse is due July 20 and will be full or partial depending upon the viewer's area, according to Dr. Gus Evans, Cameron optometrist.

From Alaska to Maine, the eclipse will be total and will be partial over Texas and the rest of the nation.

Dr. Evans notes that the American Optometrists Association has supplied recommendations on the best way to observe an eclipse.

"Observers should not use telescopes, binoculars, sun glasses, or other types of glasses, but should use neutral density filters or the construction of a simple viewing aid," AOA reports.

"There is no immediate hint of danger," the report says. "First symptoms of damage to the eye may come several hours or a day after the exposure. It causes a change in the shape of objects and the injured person sees with a red-dish tinge."

Dr. Evans suggests the use of a pinhole device which avoids the harmful infrared rays. It can be made by punching a clean hole with a pin through a piece of cardboard.

"The viewer should turn his back to the sun, hold the punched cardboard over one shoulder and let the sun's rays come through the hole onto another piece of white cardboard. The sun's image is thus reflected on the white cardboard with no damage to the viewer's eyes," Dr. Evans recommends.

Texas Football, an annual magazine, hit the newstands Tuesday and is a sure sign that football is almost here. This magazine covers the Texas Schoolboy football as well as the Southwest Conference and other college and Texas Professional football teams.

Of course in District 19AA, finalist Rockdale is the favorite. As a matter of fact they are picked third in the state. Two Rockdale players, halfback Ronnie Menn and quarterback Dickie Summers are picked as the Class AA honor roll.

Cameron is picked fifth in the district race. Standouts named by the staff of the magazine include Mike Koranek, Merlin Lester, Ronnie McWilliams, R. L. Mikulec and Mike Perrin in the line and Larry Plentl in the backfield.

The magazine thinks that Rockdale should go a long way and the stiffest competition in the district should come from Caldwell. Caldwell will return eleven lettermen with ten of them regulars from last year.

Hearne is rated next with eleven lettermen and 6 regulars. Navasota will have 16 lettermen and better balance. A & M Consolidated will be in a building year with only two seniors on the squad.

All in all, the district looks tough.

And the non-district doesn't look too easy either. The Yoemen get the powerful Rosebud team in the opener for both teams. The Black Panthers were beaten only by Midway last year and are picked second to Midway this year. Rosebud, under new head coach Bobby Pollard will have 15 lettermen back.

Then the Yoemen to Marlin to take on the District 17AA co-favorites. With 14 lettermen back they can expect to be tough.

District 20AA is in a confused situation. It looks as any of four teams may be able to take the crown. The Yoemen's third opponent, Taylor is one of them. The entire backfield is returning and it track teams help the football teams the Taylor Ducks should be on top.

After that game the Yoemen will return north and take on the co-favorites of District 17AA, West. From its 9-1 team of last season they have 14 lettermen back.

LaGrange is not a favorite but will be strong this year. They are about the only non-district team on the Yoemen's slate that is not rated as a top team in their district. And this may be because Katy is a favorite and is ranked number 8 in the state.

And then is the date of Yoe coaches and players will be waiting for. That is the open date, a much needed breather before the Yoemen hit district play.

Last year the magazine picked Denver City to win the state crown. But the rough Winters team was able to down the Denver City team in the quarterfinals. Winners were then beaten 6-0, by state champion Jacksboro in the semi-finals.

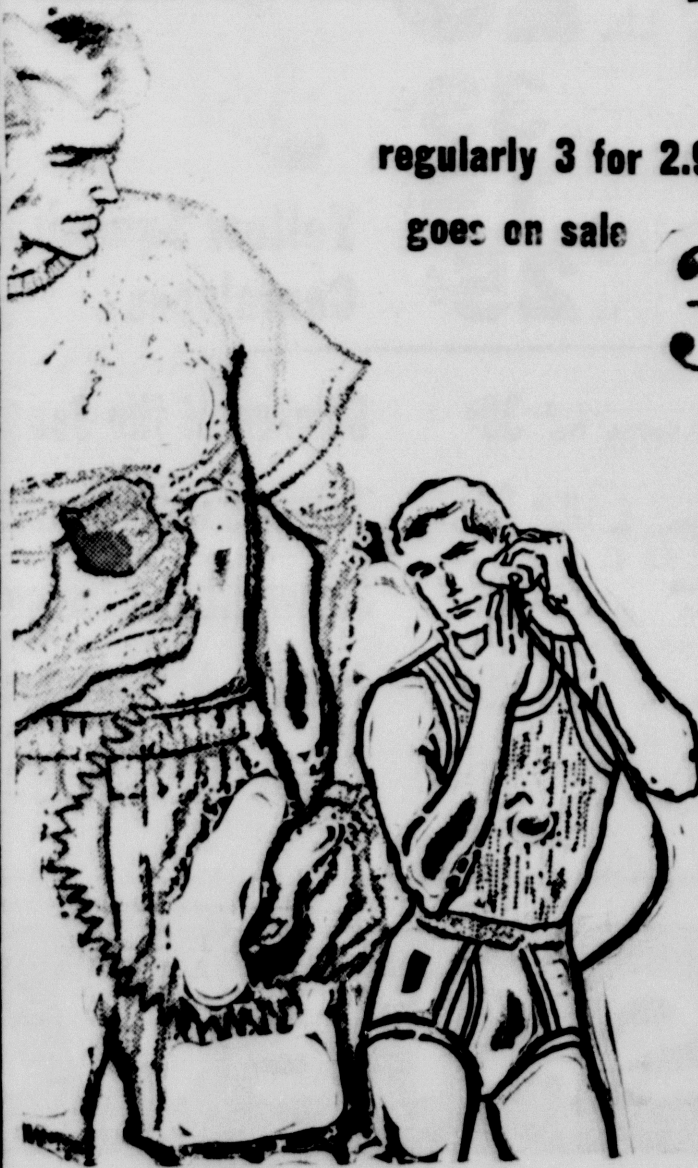

This year they are going again with Denver City. And with good reason. They were state champs two years ago, quarter-finalists last year and they have won 50 of their last 53 games.

So it looks like a good football race for Class AA again this year.

'Come To The Fair.....'

"Come to the Fair . . ."

That's the call Friday and Saturday in Cameron, seat of Milam County, and focal point of the first Town & Country Fair this weekend.

People will be jumping out of airplanes, not to see, but to be seen as an attraction of the Fair. Leaflets will fall from crop dusting planes over various Milam and area communities, another aerial tour de force.

In other words, things are going to high for this Cameron weekend, one not likely to be forgotten in several months.

Displays ranging from dairy to electronic to wildlife to business, commerce and automotive will attract wide interest.

Historical, artistic, craft and "white elephant" attractions are forthcoming. And the homemaker will reign supreme in Milam - wide home demonstration food contest, open to competition in 18 divisions.

Kiddy rides as well as games and contests for the kids will be attractive to the younger set.

And if this doesn't appeal to just about everyone, there'll be food and other fair-type items to brighten up the two-day affair and bunting is going up downtown.

Searchlights will guide night visitors to the Fair center at night. Displays will be in the Armory or main Fair Building.

You will be most welcome in Cameron, this and every weekend.

So, come one, come all . . . "Come to the Fair".

Ghost Town Hunt

Writer Seeks Out San Andres Story

Grover C. Ramsey, of Austin, was in Milam County recently researching information for a forthcoming book on Texas ghost towns.

Ramsey, whose address is P. O. Box 7104, Austin 12, was interested in the town of San Andres and gave the Herald the following information that he had gathered:

San Andres was to have been the county seat of Milam County by legislative enactment in 1842. It is shown on the San Gabriel River north bank just below the Alligator Creek mouth on "Coltons New Map

of the State of Texas." It is 3 miles south of Tracy on the Otis Charles property. Charles moved the 16'x15' original log postoffice and it is now part of his barn. Ramsey reports it to be exceptionally well preserved.

According to Ramsey, the post office officially opened February 4, 1852 and service was discontinued April 29, 1877. It was a confederate post office from 1861 through April of 1863.

Postmasters included: David Davis, Henry Carter, Floyd Davis, Augustus Spencer, John Wells, Davis, Henry Carter, Floyd Davis, Andrew Jones, J. W. Wood and P. Martin Kalb.

Walnut Grove Masonic Lodge number 145 was at San Andres meeting originally at Gordons Stand (probably an early day stage station). The Lodge was given dispensation March 4, 1854, and by 1860, the last year that it met, there were 36 members. Ramsey notes Bryant's Station Lodge number 311 was chartered in 1863 and assumes that several of the San Andres men moved there. The lodge loaned regalia to the Cameron Masonic Lodge when they burned out in 1870.

A company of the San Andres Light Horse Co. was organized for the confederate army at San Andres on June 10, 1861.

Early records show that a mission was established at San Andres in 1746 and that drives of wild horses were plentiful there as late as 1850. Ramsey believes San Andres was the early name of Brushy Creek.

Out Of The Past

From Herald Files

IN 1901

"W. T. Hefley is having the second story of his new building finished up. It will be cut up into office rooms and will be a nice office building."

From the Yarellton Community reporter: "It appears that we are undergoing one of those peculiar manias which frequently infest communities and scatter financial wrecks on every side and seldom is productive of any good. Many of our best citizens are talking and trying to sell their property for the purpose of going west and reinvesting. This condition is doubtless caused by last years rains and overflows which precipitated sickness last fall and winter and filled up tanks so there is scarcity of stock water now."

IN 1938

W. Lee O'Daniel, candidate for governor of Texas speaks at City Park to largest crowd ever assembled in Cameron for a political address. An estimated 8,000 people cheered as O'Daniel chided politicians. He was accompanied to Cameron by his children Pat, Mike and Molly, and his Hill-Billy Band.

Other notes from the 1963 Herald:

A. W. McCullin announces opening of Mack's Oil Co.

"John Davis, son of Mr. and Mrs. Judd Davis has accepted a position with the Citizen National Bank."

"Miss Viola Thomas is home for summer vacation from Stephens College, Columbia, Mo."

Dateline Austin—

Tax Men Puzzle Over Poll Fee

By Vern Sanford

County Tax Assessor collectors are meeting here to try to untangle the poll tax puzzle.

It seems that the Legislature created a smarl which will hit the couter 1. That's the date when people begin paying poll taxes and in a special election on November 9, voters will decide whether or not they want to repeal the poll tax as a prerequisite to voting.

If they repeal it, a new law will go into effect, setting up a 25 cent registration fee.

To make matter more complicated, the November 9 vote really would not repeal the poll tax. In theory, it still would be due and payable. But not many are expected to pay the tax if the voting privilege is removed from it.

ting until after November 9 to fill out and mail poll tax receipts, they may face another crisis in the spring. This because 36 states already have passed a proposed amendment to the U. S. Constitution outlawing the poll tax as a requirement for voting for president, vice president, U. S. senators and congressmen.

In January, Arizona and South and if they pass the amendment, it could be carried to law. In that event, a provision by the Texas Legislature would set up a system by which voters would apply to their harrasses county tax assessor-collectors for special registration certificates—at no charge—to vote on races involving only federal offices.

POOL HALLS GET NEW STAT

US-Townpeople who have had trouble in the past trying to set curfews on pool halls, because the the pool parlors were illegal, can look to one bright side of a law that will become effective on August 23.

City governments then will be able to set curfews because on that date the pool halls will become legal operations in Texas.

to end-A legislative "rider" in the 1964-65 state budget bill prohibits payment of travel expenses committee which meets with the State Board of Education.

This has caused the board to bid goodbye to the system which Herbert O. Willborn of Amarillo calls "one of the strengths of this administration."

Rider approved expenses of advisory committees on textbooks and teacher examiners, but cut out all others.

Commissioner of Education J. W. Edgar remarked that the practice of using "grassroots" committees of citizens interested in education "has been the lifeblood of this agency." But he discouraged suggestions that volunteer help be used if committeemen were willing to pay their own travel expenses. He said such a practice would go against the Legislature's intent and cause committees to be dominated by special-interest groups.

Riders on appropriations bills are written at the bottom of budgets for individual state agencies. It is not unusual for such riders to go unnoticed, by the lawmakers, especially when voting on bulky budget bills.

Veterans Land Brings \$5555 — Land Commissioner Jerry Sadler said the sale of 32 tracts of forfeited veterans land (totaling 2, 223 acres) was "gratifying", since it brought in more than the state's original investment plus taxes paid since forfeiture.

TIGHT LITTLE ISLAND—State Highway Department has discovered

ed an island of Mexico in the heart of El Paso.

Highway department claims that you can drive through Texas and see Old Mexico with one eye and New Mexico with the other eye.

Department says Cordova Island became a Mexican oasis in the Texas city of El Paso under the Guadalupe Hidalgo Treaty of 1848. Treaty provided that artificial changes in the Rio Grande's course would not affect Cordova Islands boundary. Now that the meandering river has changed its course the Island is surrounded by American soil.

OLD PHILOSOPHER

Kruschev Has Made Fatal Error In Letting Women Sit Under Driers

Dear editor:

People in Washington are always wondering what's going on behind the Iron Curtain, what the Russians are doing, how they get such heavy loads shot into orbit, is Khrushchev on the way out, etc., but nobody ever knows for sure.

I don't know, either, but I discovered without even getting off this Johnson grass farm that freedom of speech is about to break out in Russia.

I found out this way. I was looking through a copy of the New York Times which I found out here wedged against a fence and which must have fallen out of an airplane, which is the only way I know it could have gotten here unless some New York sociologist was driving by here studying my place as an example of rural blight and it blew out of his car. At any rate over in the magazine section I found a picture which made me suddenly realize freedom of speech is headed for Russia.

The picture showed a row of Russian women with their hair in curlers sitting under driers in a Russian beauty shop.

I don't know if Mr. Khrushchev knows this, but you can't have a bunch of women sitting under driers all afternoon without developing freedom of speech in all directions. One of the women under a drier was holding a newspaper but the others were just sitting there, and right there is where Mr. Khrushchev has slipped. It is a violation of human nature to have women sitting in a beauty shop under a drier and not expect to have an uncontrolled flow of conversation develop.

It is a fact of political life that mayors are beaten, school trustees defeated, governors exposed, and presidents tarnished as a result of the free play of words by women under driers, and this doesn't take into consideration what happens to all the individual lesser people who are given an honest going-over when nothing else is at hand to talk about.

Cotton Reports

Cotton harvesting in South Texas was halted this week by daily thundershowers according to the USDA's Agricultural Marketing service. Less than 100 bales have been harvested in the Rio Grande Valley with a few first bales picked along the Coastal Bend.

Possibly 15- percent of the cotton was open in the Valley and cotton in drought sections near Corpus Christi was popping open rapidly. Volume harvesting is expected to get underway in a week to ten days.

Austin: Plants made good progress. Thundershowers caused some shedding of leaves and small fruit. Dry weather was needed in most of the territory.

Infestations of bollworms and other insects were increasing. Numerous grown bolls were evident in the territory with a few open bolls noted. Harvesting was expected to start about July 22.

Corvair 700 Club Coupe

The hardest part about parking a Corvair is finding a nickel

That may be a slight overstatement, but such jauntiness comes easily when you're a Corvair owner.

And you can usually back it up—as easily as you can back up a Corvair. You'll find yourself doing that occasionally, if only to adjust the brakes—they're self-adjusting. That's all there is to it, and that's a good example of how delightfully easy Corvair is to own, drive and maintain.

But since we began by talking about driving, let's stick with that awhile. A large factor in the fun of driving a Corvair is the location of its engine in

the rear. Why the rear? It gives Corvair extra traction on any road surface. It provides a nearly flat floor for more useable interior space. Best of all, it produces steering so light, so responsive, you wonder why no other American-made car thought of it.

Corvair's engine is also air cooled, we might add, which means there's no anti-freeze or water for you to add. Ever.

All that pleasure from something so practical almost makes you think Corvair is unique among American cars. Which isn't surprising, because it is!

PROTECT RIGGED HOOKS

Many fishermen find it saves time to rig their worms and eels before leaving home.

This also applies to many other special rigs.

Trouble is, these lures are inclined to tangle with other tackle in your box and you lose more time untangling them than you saved in the first place.

To overcome tangling, try wrapping these rigs in aluminum foil before packing in the box.

TAKE CARE OF GUNSTOCK

You are lucky if you have a fine gunstock—one that has been carefully treated with linseed oil by the manufacturer.

Take care of your fine stock by giving it the same loving care the gunsmith gave it.

After each hunting trip carefully rub down with linseed oil. Rub oil in for at least a half hour, then wipe surplus oil off and briskly polish stock with soft, clean cloth.

THE CHURCH SERVES YOUTH

Church is for young people — whether they be five or eighty-five. In his essay, "Youth," Samuel Ullman says: "Youth is not a time of life, it is a state of mind. . . . You are as young as your faith, as old as your doubt; as young as your self-confidence, as old as your fear; as young as your hope, as old as your despair."

The Church is a great help in strengthening faith, establishing self-confidence, keeping hope alive. Down through the years many have relied upon it for aid in dispelling doubt, fear and despair.

If you have not already done so, find a church that will serve you in such a capacity and use its services to aid you in staying young in heart and spirit.

Homemakers Close

Class For Summer

Cameron - The Homemakers Sunday School Class of the First Baptist Church closed their meeting until next fall with a business and social hour. Hostess was Mrs. Carddock at the home of her daughter, Mrs. Raymond Green.

Mrs. C. E. Curtis, Sr. teacher, gave the opening prayer and the devotional was by Mrs. Gib Terry. Mrs. W. A. Heath, president, presided.

Refreshments were served by Mrs. Green and her sister, Mrs. R. A. Swanzey. They were assisted by Raymond Jr. and Mary Lee Green, grandchildren of Mrs. Carddock.

September 10 was the date set for the next meeting of the class. Mrs. Gib Terry will be hostess for the event.

CAMPFIRE COOKING

Cooking over a campfire in the open is both a pleasure and a necessity if you are far from civilization.

Some sportsmen prefer gasoline stoves, but dyed-in-the-wool outdoorsmen find no substitute for the open campfire.

There is one serious drawback to open fire cooking-the sooty, greasy pots and pans to be scrubbed bright after each meal.

Prevent your pots and pans from getting sooty by using the aluminum plates that come with ready-to-serve frozen foods. Save such pans and take them with you on your trip. Put one under each pot or pan you use.

Aluminum plates will take care of the soot, leaving pots sparkling clean.

Will all your assets go up in smoke if fire strikes?

You wouldn't burn money, so why risk losing it if a fire would catch you under-insured. Play safe by checking.

Let us make sure your home's fire insurance coverage has kept pace with today's rising property values. See us soon without obligation.
